Snow Show Rolls Into Capital

Dr. S. A. Ostazeski

On March 2 snow rollers came to the Washington, D. C., area not long after your February 17th *School Bulletin* described these products of playful winds and wet snow.

Subscriber Mrs. J. O. Legg called the *School Bulletin* editor to report that the campus-like grounds of the Department of Agriculture's Plant Industry Station at Beltsville, Maryland, were full of snow rollers.

One of her husband's colleagues at the Plant Industry Station took the picture above.
